

Metrics Module-Data Grids

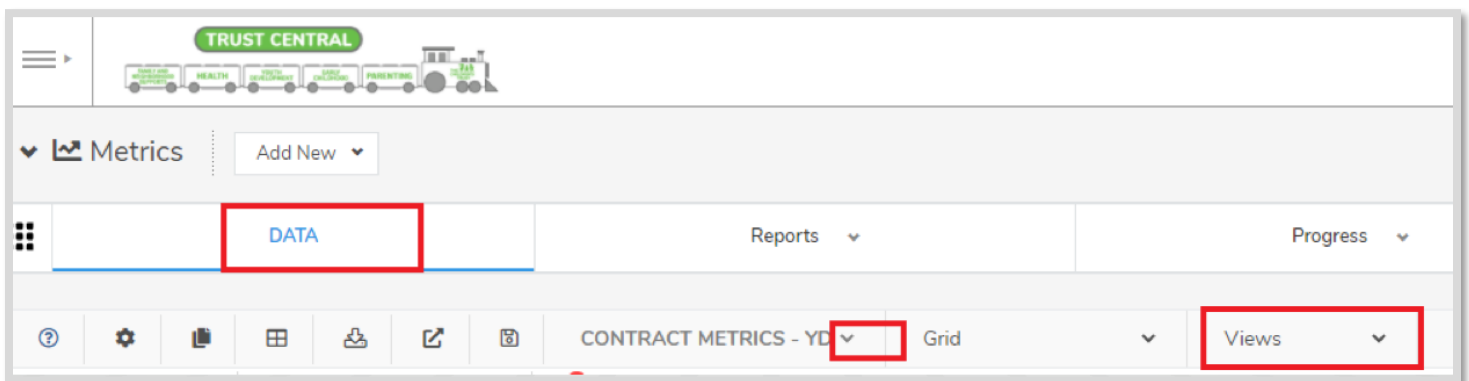

The Metrics Module is where you will find program performance information – how your program is performing. In this module, you will find the data needed to support your continuous quality improvement efforts.

The “Data” tab holds a variety of grids for the Youth Development and Family Services initiatives. This data is calculated from participant data entered in SAMIS Programmatic. It is important the data is reviewed continuously to assess program performance and data quality.

For more information on the Metrics Module [Click Here](#).

Accessing the Grids

- Go to the Metrics Module- Data Tab
- Drop down of different grids are available by clicking on the drop-down arrow.

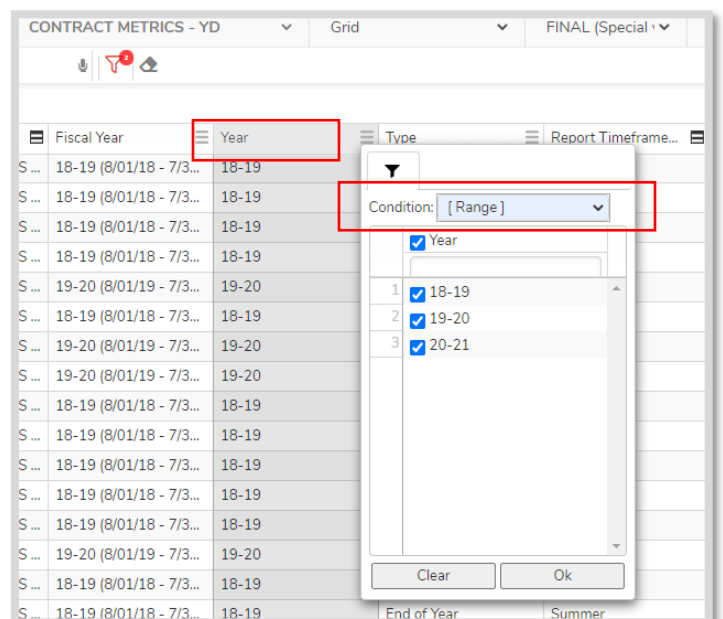

**To access the initiative-specific view in the Contract Metrics-YD grid described below click on “Views”*

Please note: You can filter for different program years within a grid. To do so, go to the “Year” field and click on the icon.

Select conditions- “Contains” or “Range” and select the year. Defaults are set to the current program year.

Years included:

- 18-19
- 19-20
- 20-21

The tables below provide a summary description of program participation grids available by initiative.

YOUTH DEVELOPMENT K-5	
Grid	Description
Contract Metrics: YD	Provides a summary of attendance, contract, and actual number of participants at the contract level. Metrics included: Service Utilization, Engagement, and Inclusion of Children with Disabilities Note: Access the initiative-specific view for K-5 program participation data by clicking on "Views" and selecting "YD K-5".
Site Metrics: YD K-5	Provides a summary of attendance, contract, and actual number of participants at the site level.
Participant Site Metrics: YD K-5	Provides participant level attendance data including total Units of Service (UOS), actual days of attendance, Children with Disabilities (CWD) status, grade and for each participant by site.
Participant Metrics by Activity: YD K-5	Provides summary of attendance by participant by the Differentiated Learning Instruction activity.
Participant Attendance	Provides each Unit of Service (UOS) entered by participant including activity, group, site, and data attendance entered. Note: This grid is useful for data quality checking attendance entered in SAMIS Programmatic.

---Continued Below---

Family Services (Parenting, Family Strengthening, FNSP)

Grid	Description
Contract Metrics: FS	Provides a summary of attendance, contract, and actual number of participants at the contract level. Metrics included: Recruitment, Retention, Engagement, and Inclusion of Children with Disabilities (CWD)
Activity Metrics: FS	Provides a summary of participants at the activity level including families and participants retained.
Participant Metrics by Activity: FS	Provides summary of attendance by participant by activity.
Participant Attendance	Provides each Units of Service (UOS) entered by participant including activity, group, site and data attendance entered. Note: This grid is useful for data quality checking attendance entered in SAMIS Programmatic.

YOUTH DEVELOPMENT 6-12

Grid	Description
Contract Metrics: YD	Provides a summary of attendance, contract, and actual number of participants at the contract level. Metrics included: Service Utilization, Retention, Engagement, and Inclusion of Children with Disabilities (CWD) Note: Access the initiative-specific view for 6-12 program participation data by clicking on "Views" and selecting "YD 6-12".
Cohort Metrics: YD 6-12	Provides summary of Children with Disabilities (CWD), retention and engagement by cohort.
Participant Cohort Metrics: YD 6-12	Provides participant level attendance data including total Units of Service (UOS), active weeks, expected sessions, expected weekly hours, actual days of attendance, Children with Disabilities (CWD) status, grade, for each participant by cohort.
Participant Metrics: YD 6-12	Provides participant level attendance data including total UOS, actual days of attendance, Children with Disabilities (CWD) status, grade, for each participant.
Participant Attendance	Provides each Unit of Service (UOS) entered by participant including activity, group, site and data attendance entered. Note: This grid is useful for data quality checking attendance entered in SAMIS Programmatic.
