1 THE CHILDREN'S TRUST JOINT FINANCE  
2 AND PROGRAM SERVICES, HEALTH COMMITTEE MEETING  
3

4 The Children's Trust Joint Finance and Program  
5 Services, Health Committee Meeting was held on  
6 August 29, 2019, commencing at 9:30 a.m., at 3150  
7 Southwest 3rd Avenue (Coral Way), Miami, Florida  
8 33129. The meeting was called to order by Kenneth  
9 Hoffman, Chair.

10  
11 COMMITTEE MEMBERS:

12 Kenneth C. Hoffman, Chair

13 Dr. Magaly C. Abrahante

14 Nelson Hincapie

15 Javier Reyes

16 Pam Hollingsworth

17 Laura Adams

18 Constance Collings

19 Mary Donworth

20 Richard Dunn

21 Lourdes Gimenez

22 Com. Barbara Jordan

23 Tiombe Bisa Kendrick-Dunn

24 Shanika Graves

25 Leigh Kobrinski

PROCEEDINGS

(Recording of the meeting began at 9:30 a.m.)

MR. HOFFMAN: I'd like to call the meeting to order. Okay, we have a very busy agenda today, so let's get started.

First, we're going to have a brief Board meeting to discuss two items, and then we'll dive into the strategic plan for the rest of our time together.

Before we get to the formal business of the meeting, I'd like to welcome Beth Edwards. Beth is going to be replacing Dr. Lawther in her position, representing the Miami-Dade counsel of Parent Teachers Association, Parent Teacher Students Association. Beth is currently vice president and will become president of that organization as Dr. Lawther steps off to run for the School Board. So congratulations to both. Dr. Lawther will be on the Board in the first TRIM hearing, but we invited Beth to come to familiarize herself with the Board and the strategic planning process.

Also, in a few minutes we'll be discussing two candidates who applied for the at-large Board seats. I think all of you know that the Trust suffered a great loss two weeks ago when Gus Barreiro died. Many of us have personal stories or remembrance of Gus. I

1 can't think of a better of way of describing Gus and  
2 remembering him than in the words of our founder, Dave  
3 Lawrence, when he said, "Gus was simply one of the  
4 finest people I've ever known. Loved people, and they  
5 loved him. A heart and soul for service." And Gus  
6 truly was a public servant. He'll be missed dearly  
7 not only by the Trust, but by the community as a  
8 whole. And I'd like to thank Jim and the rest of the  
9 staff for everything they've done to help the Trust  
10 cope with this tragedy. We do plan to bring before  
11 the Board, at a later date, something to honor Gus.  
12 But for now I'd just appreciate it if we can observe a  
13 moment of silence in his honor. Thank you.

14 So, on to the business of the meeting, thank you.  
15 Are there any public comments, Muriel, for Board  
16 retreat?

17 MS. JEANTY: No public comments.

18 MR. HOFFMAN: No public comments. Okay, so the  
19 first action item, we had a bylaws committee, on the  
20 agenda, Susan?

21 MS. NEIMAND: Okay, so you have in front of you a  
22 set of bylaws. If you would look at pages 4 and 7,  
23 the exceptions portion on page 4, you can read in  
24 green, that is underlined, the change, and what is  
25 stricken is in red. So what has been changed has to

1 do with the Nominating Committee. And specifically  
2 what is being changed is that -- okay, you can read  
3 it. I mean, I don't want to read it. Do you want me  
4 to read it? So it will now say, "upon arrival by the  
5 Board of an organization to fill either such seat, a  
6 Board clerk shall notify the approved organization and  
7 request that the organization designate an individual  
8 to fill such seat. The Board shall review the  
9 organization serving in a locally recognized faith-  
10 based coalition and local alliance for coalition  
11 engaged in cross-system planning on health and social  
12 service deliberated counter seats every six years to  
13 reevaluate." And this has to do with the fact that we  
14 added groups this year into the total composition of  
15 the Board. So this identifies exactly what would  
16 happen in that situation.

17 MR. HOFFMAN: Can I just clarify? We didn't add  
18 any groups. The groups had previously been  
19 specifically designated in the ordinance. And as a  
20 result in the change of an ordinance, approximately a  
21 year ago, the names of the individual groups were  
22 changed to be faith-based organization and health  
23 organization. And they were generic, so we needed to  
24 change the bylaws to make sure there was a procedure  
25 in place to identify these organizations from time to

1 time, as a Board.

2 MS. NEIMAND: And the changes are that we removed  
3 the term limits to these positions and we've added  
4 language to reevaluate the organizations identifying  
5 to fill these positions every six years. So that is  
6 the change that was recommended and voted on by the  
7 Nominating Committee.

8 The second page, on page 7, and the following  
9 changes you can see the cross outs and the additions.  
10 But basically in sum, what was done was remove the  
11 requirement to submit notifications of absences in  
12 writing prior to meetings. We understand life happens  
13 and people have responsibilities. We changed the  
14 number of absences deeming resignation from the Board  
15 from three within a fiscal year to three consecutive  
16 absences, for a total of five absences within a fiscal  
17 year. So we made it sort of more open for people to  
18 be able to come to the Board meetings. We moved  
19 language related to excusing absences for a good cause  
20 and removed language related to notifications sent to  
21 Board members related to absences. So this was  
22 clarified and made much more open in terms of  
23 respecting the Board members. So those were the  
24 changes.

25 MR. HOFFMAN: Any discussion or do we have a

1 motion to adopt the changes to the bylaws?

2 MS. HOLLINGSWORTH: So moved, Hollingsworth.

3 MS. GRAVES: Commissioner Jordan, moved it.

4 Second.

5 MS. HOLLINGSWORTH: Second, Hollingsworth.

6 MR. HOFFMAN: Any discussion?

7 (NO VERBAL RESPONSE)

8 MR. HOFFMAN: All those in favor?

9 (WHEREUPON, the committee members all responded  
10 with "aye.")

11 MR. HOFFMAN: Opposed?

12 (NO VERBAL RESPONSE)

13 MR. HOFFMAN: Motion carries.

14 We'll move on to the Nominating Committee  
15 recommendations. Mary Donworth is going to take that  
16 role to report on the Nominating Committee.

17 MS. DONWORTH: Good morning, everyone. There  
18 were two vacancies created with resignations of  
19 Rodester Brandon and Tony Esteven [phonetic]. These  
20 positions were advertised from June 17th to July 19th.  
21 There were a total of 26 applications that were  
22 received. The Nominating Committee met on July 23rd  
23 to review the applications and after the screening  
24 process decided to interview eight applicants. The  
25 Nominating Committee met again on August 21, 2019 to

1 interview the candidates. After the interviews, the  
2 Committee is recommending that Matthew Arsenal and Dr.  
3 Monique Jimenez-Herrera fill the two vacancies. Mr.  
4 Arsenal is presently the CFO of Baptist Health and  
5 will bring a health perspective to the Board. Dr.  
6 Herrera is a psychologist and is the department head  
7 of social sciences at Miami-Dade College. She has  
8 worked with children and adolescents in various  
9 settings and brings a much needed skill to the Board  
10 for this compilation.

11 Can I get a motion to approve these two  
12 candidates?

13 MS. HOLLINGSWORTH: So moved, Hollingsworth.

14 MR. DUNN: Second.

15 MS. DONWORTH: All those in favor?

16 (WHEREUPON, the committee members all responded  
17 with "aye.")

18 MS. DONWORTH: Motion passes. Thank you.

19 MR. HOFFMAN: Okay, that then concludes the  
20 business part of the meeting. So for the next few  
21 hours, we're going to focus on the Trust strategic  
22 plan. Similar to last year's retreat, it's going to  
23 be a Board driven session with majority of time spent  
24 listening to input from you. This is not intended as  
25 a full review of the strategic plan or to revise a

1 plan at this time. As you know, we're currently in  
2 the second year of a five year funding cycle for most  
3 of our initiatives, which are in alignment with the  
4 current plan. And so we approach the middle of the  
5 current funding cycle, we did a more robust strategic  
6 planning review with the goal of adopting any changes  
7 to the plan before the next funding cycle begins. And  
8 it's when we start letting out the RFP's for the  
9 cycle. Everyone will have an opportunity to  
10 participate in that process. So you have something to  
11 look forward to next year.

12 I know all of you have read and are familiar with  
13 the current strategic plan, but just to make sure,  
14 we're going to start with an overview of key elements  
15 of the plan, led by our own Dr. Laurie Hanson. Laurie  
16 will focus in particular on our prior investment areas  
17 and key results. After the overview, we'll divide  
18 into smaller breakout groups focused on three topics:  
19 early childhood, school-aged youth, and special  
20 populations. Each group will spend time on each of  
21 the three topics with the goal being to facilitate  
22 dialogue among Board members about the opportunities  
23 and challenges that may impact The Children's Trust  
24 strategic planning in these areas, as well as to  
25 elicit policy guidance to inform future priority

1 investments and results.

2 Finally, with all of your input in hand, staff  
3 will organize the results. You will have an  
4 opportunity to review the entire Boards input, as well  
5 as the vote on the top priority investment areas and  
6 issues that have been identified by the Board. Staff  
7 has put in a lot of hard work to make this a  
8 meaningful day for us, and in case we lose some of the  
9 Board before the end of the meeting or run out of  
10 time, I want to take this opportunity to thank all of  
11 our staff, and in particular, Dr. Hanson, for putting  
12 this session together for us. Thank you.

13 I'd also like to thank three of our Board members  
14 who volunteered to facilitate the group discussions.  
15 That's Pam Hollingsworth, Mary Donworth, and Mark  
16 Trowbridge. Thank you. I also want to recognize that  
17 our newly appointed director that's shown up, Dr.  
18 Herrera, welcome to the Board. So with that, I'm  
19 going to turn it over to Dr. Hanson.

20 DR. HANSON: Okay, so you have at the top of your  
21 agenda some of the results we hope to achieve today.  
22 So as Ken said, we just want to make sure with new  
23 people coming on that there's a clear understanding  
24 about what's in the strategic plan, what are our  
25 priority investments in the key results that we see.

1 We want you to have a chance to have some meaningful  
2 conversations, so we're going to be breaking you into  
3 small groups and having you rotate through some  
4 topical discussions. And then gather your input in a  
5 couple of different ways. At the end of each small  
6 group session, you'll be sort of putting your top  
7 issue or idea or thought on a sticky note that you'll  
8 need that we'll then collect together and bring back  
9 to show you at the end. And then at the end, you'll  
10 also be able to prioritize some of those topics, as a  
11 group.

12 So for new Board members, we do have a few extra,  
13 I think we were distributed a few meetings ago or  
14 probably several meetings ago now because we're  
15 starting to work on our next annual report, but this  
16 is our most recent annual report of our results. So  
17 many of you may have got a copy of this previously.  
18 We'll make sure that the new people, you can come and  
19 get a copy here. And you also have in your papers  
20 that you got today, a few select slides from the  
21 PowerPoint that I'm going to be going through, that I  
22 thought you might want to have for reference as we go  
23 through those. And then your data placemats, which  
24 we're going to review in a bit.

25 So I'm not going to read to you the slides. I

1 think you are familiar with our mission and our  
2 vision. And you're aware that with the Boards  
3 governments and guidance, the Trust staff execute on  
4 this mission and vision, but we only can do that in  
5 partnership with the community service providers and  
6 other partners across the community to make things  
7 happen. Within our strategic plan we describe a  
8 number of core values or foundational values to The  
9 Children's Trust. And the most foundational one, I'm  
10 going to kind of go in this slide from the bottom up,  
11 is all children are our children. So, The Children's  
12 Trust really does serve the entire community of Miami-  
13 Dade County.

14 And then if you move up to the next level, so  
15 what do we mean by the whole child? It's really  
16 important to focus on children's social, educational,  
17 economic and environmental backgrounds. All of those  
18 things have an impact on whether our vision can be  
19 realized, that every child is reaching their full  
20 potential. However we balance that blue foundational  
21 box with the construct and really important factor in,  
22 especially our community, that vulnerable populations  
23 and neighborhoods sometime need additional resources.  
24 So we fund more programs, more densely, high poverty  
25 areas across our community. We pay special attention

1 to children with special healthcare needs. Children  
2 and youth with disabilities, children in foster care,  
3 involved in criminal justice, experiencing  
4 homelessness. Those sorts of things that we know  
5 contribute to disparity and challenges for growth and  
6 development. So it's a balance to honor these two  
7 things, but they're both critically important.

8 Another sort of foundational practice and value that  
9 the Trust has had is the belief that evidence based  
10 practices can ensure our best chance to success with  
11 children and families.

12 And then the top level of things are really  
13 related to the fact that we know it's critical to  
14 invest early in Early Childhood, but you can't just do  
15 that and then drop off, right, so it's also as equally  
16 important to sustain investments across the  
17 developmental continuum, to continue to support  
18 children and their families. Partnership is critical  
19 because we know not one single program or organization  
20 can accomplish these allottable vision and mission  
21 statements that we have alone, right. So we work with  
22 other systems, other funders, and as I mentioned, our  
23 service providers, to make this work happen. Aspects  
24 of that involve our community engagement team that's  
25 out there really working on an empowerment model to

1 help residents and neighborhoods take on projects to  
2 improve things from what they see that's needed. To  
3 coordination and integration across our funded service  
4 providers, realizing that one funded program may not  
5 need all the needs of a family they come in contact  
6 with, that there's probably another program that maybe  
7 can address some of the other needs.

8 The continuous learning mindset. So we want to  
9 have a growth mindset. We want to be strength based  
10 on always learning from what we're doing. We feel  
11 like that is going to yield us the highest quality  
12 services and the best return on the investments that  
13 we make.

14 So the next two slides, which you have printouts  
15 of, are just a reminder of our key results, the  
16 headline results that are a part of our strategic  
17 plan. These are results that are important to a  
18 number of organizations across our community and we  
19 work with those people to coordinate on these. We  
20 kind of have it divided in two. The first set are the  
21 community and family supports that are needed to  
22 facilitate child well-being. So we know that high  
23 quality early childcare environments are critical, you  
24 know, 90 percent of a child's brain is developed in  
25 its first five years. They need a really high quality

1 environments from in their homes and in their formal  
2 childcare facilities. We know that access to regular  
3 care early on can actually prevent many challenges  
4 later related to health, both, physical health and  
5 mental health. And that most critically children need  
6 nurturing and involved parents to give them the best  
7 chance of success.

8       So what is it that we mean by child well-being?  
9 This is the set of five community results that we have  
10 selected in our strategic plan to seek for children.  
11 They kind of stand across different domains of child  
12 development from learning to physical fitness and  
13 activities, to appropriate behavior and successful  
14 transition to adulthood. And I just want to note that  
15 these are broad results that we seek. These are  
16 measured through something that we call community  
17 indicators. Typically, there are more than one  
18 indicator available, there's more than one measuring a  
19 community available to give us information about any  
20 one of these results. So what we do is we try to  
21 gather what's available related to each result and  
22 examine those together to give us a sense on how we're  
23 doing as a community on these different headline  
24 results. We do annual updates to a set of community  
25 indicators that we track, that are in that annual

1 report, to the Board of County Commissioners, that we  
2 produce every year. Florida Kids Count, also puts on  
3 a report card on a regular basis. So there's lots of  
4 information out there to sort of give us a sense of  
5 how we're doing. And I'll just say, again, it takes a  
6 coordinated effort of the whole community to achieve  
7 the results at the population level that we're looking  
8 for. So no one entity moves these needles alone, but  
9 we are definitely part of a rich community in Miami-  
10 Dade County that is seen as important.

11 So what do we do with our funding to kind of work  
12 towards these results. The next slide shows our  
13 priority investment areas. These are the seven areas  
14 that are outlined in our current strategic plan.  
15 These are also categories in our budget. So we have  
16 most of these activities and funding investments  
17 rooted in prevention strategies. We put things in  
18 categories to make a budget, but again, just to  
19 acknowledge that these things relate to one another.  
20 They sometime overlap. They certainly should be  
21 mutually supportive of each other. There are things  
22 we're doing, for example, in health that relate to  
23 early childhood health. And so that relates to early  
24 childhood development and so forth. So typically  
25 we're looking at how these things are interacting

1 together, but then when we present the information to  
2 you, you can see them clearly defined in these  
3 categories.

4 Now, the next slide has kind of a lot information  
5 on it. You have a printout of it. But this really  
6 basically is a crosswalk to show you the relationship  
7 to the two things we just talked about. Our priority  
8 investment areas and are headline community results.  
9 So as you can see, as I've kind of said a couple times  
10 already, it's not a one to one relationship, it's a  
11 many to many relationships. So most of our  
12 investments relate to multiple result areas. Just as  
13 an example, you can see that our youth development  
14 programs are focused on academic success, healthy  
15 physical activity, appropriate behavior, and  
16 successful transition to adulthood. So there's  
17 multiple aspects going on there.

18 And the next slide has even more information on  
19 it, but I really want to highlight a couple of key  
20 points about how our community indicators, our  
21 community results relate to our program level activity  
22 and our program evaluation and our measurement of the  
23 results of our program investments. We plugged in an  
24 examples, so this just has an example of one of the  
25 investments that we made. A major investment, after

1 school programs. And as you can see, this investment  
2 relates to multiple results that we have, academic  
3 achievement, physical activity, appropriate behaviors.  
4 This relationship, though, is not a direct cause and  
5 effect. It's a contribution relationship. So the  
6 work at a program level is contributing to us moving  
7 in this direction for our community. What we do for  
8 the consumers of our programs is helping across the  
9 county to move towards these goals that we have. But  
10 we also have to recognize that these goals that we  
11 have, the results on the right-hand side of this  
12 slide, are influenced by many factors beyond the  
13 program that they -- beyond the three hour after  
14 school program that they go to. There's a lot of  
15 discussion and I know in the past about social  
16 determinants of health. The influence of neighborhood  
17 and your zip code and how that influences the  
18 opportunities that you have. And so we have to  
19 recognize that it's not in a vacuum, that this is  
20 happening, that this program is happening.

21 Also, our programs don't serve every child in  
22 Miami-Dade County. So we have more than half a  
23 million children under 18 in our community and are  
24 serving a very small fraction of that. In our after  
25 school and summer programs, there's about 30,000 kids

1 a year. So we know that's going to, you know, we have  
2 to have the appropriate responsibility and attribution  
3 there. Our community results, though, are guiding  
4 stars, right. This is the north star of where we want  
5 our program efforts to be focused. So ideally what we  
6 do when we pick the measures that we're going to track  
7 in a program, is we have to align those measures to  
8 the results that we're seeking in a community. So  
9 that way we can kind of always keep a track on how  
10 well are we serving the -- that 30,000, we should  
11 definitely be holding ourselves accountable for in  
12 terms of the measures that we see as our valued  
13 measures.

14 So we want to just make sure we avoid the trap of  
15 looking at, okay, well you had a teen pregnancy  
16 prevention program that served 5,000 teens and did the  
17 teen pregnancy rate go up or down. You have to look  
18 at the teen pregnancy rate within those 5,000 teens  
19 that you worked with, not at the community level.  
20 But, with that said, we have to hold ourselves, and I  
21 say the royal ourselves, are the Children's Trust and  
22 our community partners, our policy makers, our  
23 legislators, our other community service providers  
24 responsible for these guiding stars, these overall  
25 community results that we want to see for children in

1 the community.

2 This next slide just gives you a snapshot of  
3 where is the funding. Using those categories, again,  
4 recognizing that there's categories of what's  
5 happening in those sort of overlapping, they relate to  
6 one another. This shows you a visual, our largest  
7 investment is youth development. However, we have  
8 made significant increases in parenting and early  
9 childhood with the Board's guidance over the past two  
10 to three years prior, in the input and the  
11 solicitations that were put out the last cycle. We  
12 have, as you know, an annual budget process that  
13 determines our budget. You guys have kind of been  
14 through that. We're coming up on the end of that now  
15 with the TRIM hearings. And we announce in the  
16 budget, are typically tied to our funding cycles,  
17 which come through competitive solicitations. And  
18 right now we are, for the most of our major  
19 initiatives, entering this second year of a five year  
20 cycle.

21 So I'm going to pause there and see if you have  
22 any clarifying questions about those overview slides  
23 about our headline results, our investment areas, how  
24 those connect to one another, and the budget  
25 breakdown.

1 MR. KIRTLAND: Excuse me.

2 DR. HANSON: Yes?

3 MR. KIRTLAND: You mentioned something about zip  
4 codes, and I was thinking is there any gap available  
5 that provides the highest concentrated areas of  
6 challenges per zip code?

7 DR. HANSON: Absolutely. And I promise I did not  
8 ask him to ask that question. But when we start to  
9 walk through the placemats that you have in front of  
10 you, you will notice on the back of each one there are  
11 maps that have different sets of data on them. And I  
12 will go through these with you as soon as we finish.

13 Any clarifying questions on this?

14 MR. HAJ: So just to be clear, we will be able to  
15 see if third graders are reading at grade level and  
16 the partners that we fund will give us that data?  
17 Because I know in the past, and I don't know if it's  
18 in grades, or how will we know that they are indeed  
19 reading at grade level?

20 DR. HANSON: Well, right now our programs collect  
21 their own reading measures, pre-imposed for their  
22 program. And they look at -- they look at two things,  
23 they look at both the level at which children are at  
24 and then they also look at growth, like did they  
25 change or improve over the course of the program. So

1 we've had access to that data in our own ego-system  
2 for our programs. Now we have started a partnership  
3 with the school district to, through their research  
4 review community, to be able to look at the school  
5 data connecting to our students. We aren't in that  
6 place totally yet, but we're definitely looking toward  
7 more integrated data partnerships, and we've done a  
8 little more in the early challenges phase around  
9 integrating data to look at sort of what kind of  
10 kindergarten readiness factors resulted later school  
11 success. So yes, those are the kinds of things we are  
12 looking to try to make connections with.

13 MR. HAJ: So we won't be able to see the grades  
14 just yet?

15 DR. HANSON: Not yet. But we're getting there.  
16 Yes?

17 MR. HOPE: Steve here. So I attended a Board  
18 meeting for language and prevention. There was a  
19 presentation on the ACEs, Adverse Child Experiences.  
20 And they talked about given those experiences, it can  
21 have a significant impact on the development of a  
22 child in the early stages. So seeing that we have 90  
23 percent budget allocated to early child development,  
24 do you believe that there should be a higher  
25 allocation in that category trying to address some of

1 the issues at the earlier stages, whereas you have  
2 about 39 percent in youth development?

3 DR. HANSON: I'm going to pause on that question.  
4 I'm going to ask you to bring that question to your  
5 small group discussion. That's exactly the kind of  
6 input and thoughts that we want to get from you.  
7 Right now I would just like to make sure that for the  
8 slides that you have, that we've gone through, is  
9 there any other clarifying questions? Because I do  
10 want to make sure before you go to the breakout  
11 sessions, that I've given you a little bit of an  
12 overview walkthrough of what's on these. There's a  
13 lot of information here.

14 COMMISSIONER JORDAN: In the strategic planning  
15 session, this session, I understand we're going to  
16 have breakout sessions, but are we going to have an  
17 opportunity in this session, where we have a  
18 collective Board, to kind of throw out concepts and  
19 ideas that we feel should be a part of the overall?  
20 Or do we come back together and do that at the end of  
21 the session when maybe half of the room is gone?

22 DR. HANSON: Well, hopefully everyone -- but,  
23 yes, our plan was that -- its difficult in a room this  
24 large to have everyone have the discussion time that's  
25 needed, so that's why we are splitting into the small

1 groups for sharing your ideas. We're going to --  
2 you're going to put them on the sticky note, we're  
3 going to have notetakers in every room, then we're  
4 going to bring that information back in here to show  
5 it to you all and have you summarize and do a gallery  
6 walk and see what other ideas -- also, as you rotate  
7 through the sessions, you will see the notes from the  
8 people who were in the room before you on that topic,  
9 so you can say, yes, I second that idea, you know, I  
10 want to add this idea. That's how we designed this.

11 COMMISSIONER JORDAN: Okay, because the concern  
12 that I have is that the Board serves as a policy  
13 board. And in serving as a policy board, it's one  
14 thing to break up into groups and come up with ideas  
15 that help with programming. But what's said in  
16 policy, that to me needs to encompass as the entire  
17 Board and not just be something that's checked off in  
18 a small group and then it may or may not be adopted  
19 without having the entire Board be a part of it. I  
20 bring this up because a few meetings ago I raised an  
21 issue regarding childcare services. And I then asked  
22 for information from Early Learning Coalition and they  
23 provided me with all of the information regarding all  
24 of the centers. I asked for the same information from  
25 Head Start. And they provided me with all the

1 subjects they had. One of the things I found and I'm  
2 not sure about Early Learning Coalition is that with  
3 the Head Start, more than 40 percent of the parents  
4 are not working. And part of the reason, and this is  
5 what I brought up in the meeting, part of the reason  
6 that they're not working is because, for the most  
7 part, the childcare centers close at three o'clock and  
8 the public schools. And at four o'clock at the  
9 centers. Parents who have a job work until five  
10 o'clock or six o'clock. If your children stay beyond  
11 three o'clock or four o'clock, those parents have to  
12 pay for the children to stay. And to me that needs to  
13 be a policy decision or a policy discussion with this  
14 Board about do we want to have a policy where we have  
15 expanded hours.

16 As a matter of fact, I met with Amir yesterday  
17 because we were talking about Head Start. I mentioned  
18 to him that when I came through Head Start as a  
19 teacher, we had shifts, 7-3, 8-4, 9-5, 10-6. And you  
20 may have had two people coming on at seven and two  
21 people who stay from 10-6. But it allowed the parents  
22 an opportunity to have a job. Now I know we have Pre-  
23 K and other program funding sources, but what I had  
24 found is that those sources are being used to  
25 supplement as opposed to expand the hours so that

1 parents can work. To me that's a policy discussion  
2 this entire Board needs to have. And not just be  
3 relegated to a group.

4 MR. HOFFMAN: Commissioner Jordan, thank you. I  
5 think that this is precisely the type of issue that we  
6 want discussed by the Board. As Lori said, in format,  
7 we're all going to rotate through the groups in  
8 different areas and then get together and talk about  
9 the results. So I do think that there's an  
10 opportunity, but as we designed the session, felt it  
11 was better to identify some of those issues. And this  
12 is precisely one of the ones I think has been  
13 preidentified as a discussion topic. So to do that,  
14 and then bring it back to the full Board, and have a  
15 robust discussion.

16 COMMISSIONER JORDAN: Well, I have about five  
17 hundred.

18 DR. HANSON: That's great. That's great.

19 MR. HOFFMAN: Perfect.

20 DR. HANSON: We want to get them all down. If we  
21 need to follow up as well, we plan to bring back at  
22 the end we'll have the gallery walk, we'll have some  
23 prioritization, we'll have all your input. And then  
24 depending on where that lands us, we'll be following  
25 up in different ways. We can't pursue that yet

1 because we need to see what comes up and how many  
2 things and is it related to a specific -- we did work  
3 groups in the past, topical work groups to work on  
4 ideas. So it's definitely not intended to just be --  
5 first of all, it's not intended to just be  
6 programmatic input. We are looking for your policy  
7 input. You all wear different hats in the community.  
8 You have different experiences that you bring to the  
9 table and we hope that you will all bring those fully  
10 to the table today. And then inform us. Really,  
11 we're framing these discussions around strategic  
12 opportunities and challenges.

13 So your example is a perfect example of a major  
14 challenge in the community with the system of care,  
15 around early childcare and Head Start. And then so  
16 what are the opportunities there to work on that  
17 issues. So I think it's a perfect example of the kind  
18 of thing we'd like to see generated in the small group  
19 discussions and then brought back into the larger  
20 fold.

21 DR. ABRAHANTE: On the slide that compares the  
22 children and youth and the different components, the  
23 one with the little squares. That one.

24 DR. HANSON: Uh-huh.

25 DR. ABRAHANTE: I think in the succeed

1 academically section, the early childhood development  
2 box needs to be filled in for sure. Because that is a  
3 key piece and the Commissioner was just talking about  
4 that. Of that piece. So I would make that  
5 recommendation.

6 DR. HANSON: Yes. We kind of have that under the  
7 ready for kindergarten, that the more that a child is  
8 ready --

9 DR. ABRAHANTE: But it goes beyond kindergarten.

10 DR. HANSON: [crosstalk] it's all pre-  
11 preparations that contributes to academic success.

12 DR. ABRAHANTE: But as you know, it goes beyond  
13 kindergarten. The impact of what the child receives  
14 in early childhood --

15 DR. HANSON: Absolutely.

16 DR. ABRAHANTE: -- stays with that child forever.

17 DR. HANSON: Absolutely. Although we were just  
18 trying to hone in on the top -- I mean, I could  
19 probably make an argument that every box on this  
20 picture should be filled in, right, and then it, you  
21 know --

22 MS. GIMENEZ: Well, that was going to be my  
23 comment for parenting. It has to be every box because  
24 the parents critical in any of these categories,  
25 whether they're successful and they're healthy. If a

1 parents going to take their child to the doctor, their  
2 child's not going to receive the medical care or  
3 mental care that he or she needs.

4 DR. HANSON: Right. Absolutely.

5 MS. GIMENEZ: So that's where we draw the line as  
6 to how important it is and to which area.

7 DR. HANSON: Yeah, yeah.

8 MS. KENDRICK-DUNN: And going back to that,  
9 because I had the area that says meets recommended  
10 levels of physical activity, I think parent definitely  
11 has to be involved with that. And then early  
12 childhood because this physical activity, which  
13 relates to physical and mental health, is going, and  
14 emotional health. If you start this early and you  
15 make this something as natural for a child, then maybe  
16 we'll have better health outcomes with certain groups  
17 of people in our community. But it needs to start  
18 when their kids go.

19 I think that for the physical activity, all the  
20 areas should be checked, even the family and  
21 neighborhood supports because communities need to be  
22 held responsible for making sure that our youth are  
23 not sitting and on the phone playing video games,  
24 whatever. And then the transition to adulthood, I  
25 think parenting because I don't think you ever stop

1 being a parent because your child turns 18. That  
2 support is needed. But I think parenting, and I think  
3 early childhood development, and then health and  
4 wellness because without that health piece, you can go  
5 into adulthood and struggle with health. And we know  
6 that we can prevent so many health chronic medical  
7 conditions that we see with certain populations of  
8 children if we start early.

9 DR. HANSON: Absolutely. So you guys have  
10 totally gotten the message of how all these things are  
11 really interrelated. So I appreciate that. I want to  
12 now just -- I'm going to say a couple of words about  
13 two of our investment areas that were in that circle,  
14 have to do with community awareness and advocacy and  
15 professional development. And we basically see these  
16 as sort of foundational investment areas. You might  
17 recall from the budget slide, these are very small  
18 percentages of our budget, about four percent in each.  
19 But we see these as critical sort of infrastructures  
20 supports to all the other areas that we're working in.  
21 So the connection, collaboration, learning, all of  
22 those things amongst our programs are important sort  
23 of processes to be happening to keep moving our  
24 results forward. So we want advocacy for good public  
25 policy, we want residents to know what services are

1 available. We want appropriate program for motion.  
2 We want to empower the community residents through  
3 community engagement. And then cross fund  
4 collaboration to leverage other resources. We have a  
5 number of capacity building efforts and particularly  
6 fostering small CBO capacity building and of course  
7 our research evaluation and innovation investments are  
8 really important for the learning aspect of what we're  
9 doing. But then, so our three areas for the breakout  
10 sessions as you can see on your agenda, have to do  
11 with early childhood. And by that I don't mean just  
12 one of the seven boxes of early childhood development,  
13 I mean all of what we do that relates to children from  
14 birth to school entry basically, so the year that they  
15 turn five.

16 School aged youth, again, relating to all that we  
17 do for kids that once they're in school until they  
18 complete school. And then special populations. So we  
19 have a number of vulnerable populations that we  
20 mentioned earlier that we know need our additional  
21 attention. I want to -- there's a lot of information  
22 on these data placemats. I want to first say thank  
23 you to my team that worked on these. Some people are  
24 in here, some people are not, but we worked hard to  
25 bring some available information. I'm going to walk

1 you through the structure of what's on here. But I  
2 also just want to emphasize that I don't expect you  
3 all to fully digest everything that's on these, you  
4 know, basically three pages, front and back of lots of  
5 detailed information. This is not a one and done  
6 information resource. This should be a lasting  
7 resource to you as reward to be data informed in your  
8 thinking, but also kind of gives you an idea the kind  
9 of information we can bring. So if you have questions  
10 and things that maybe aren't answered on here, you can  
11 let us know. We can make sure we're bringing the  
12 right information to you to help you in your guidance  
13 and policy development.

14 And so with that, I wanted to make sure that we  
15 reviewed these in here. We have only about ten or  
16 fifteen minutes left and we're supposed to start our  
17 rotations. But I want to answer clarifying questions  
18 about these in here while we're all together. So I'll  
19 just walk you through this structure.

20 On the side that looks more horizontal, like a  
21 placemat, the gray bar just reminds you of the  
22 investments that relate to that age group or to that  
23 set of special populations. In the other side of the  
24 document, we have sort of three sections. We have the  
25 top section that sort of gives you some rational.

1 This is typically based on research that we have  
2 gotten from other national and return on investment  
3 research about why this is important, why this area is  
4 important. The middle section really brings you some  
5 highlighted community indicators related to that area.  
6 And then the bottom section is a selection of some of  
7 our program results that we thought were important to  
8 highlight. And I'm just going to show you the back,  
9 that when you flip it over, because our county is  
10 shaped long and skinny and tall, we have to turn our  
11 placemats over to be able to see the biggest map  
12 possible. And so we have three maps. Each one has a  
13 different background on it. the background is noted  
14 by the shades of gray that are there. And then each  
15 map has a separate set of docs on it. There's some  
16 demographic information at the top of each map that  
17 relate to either early childhood, school age or  
18 special populations.

19 And so on the early childhood map, for example,  
20 what we have put on here is kindergarten readiness  
21 rates is the background and the dots are the programs  
22 we fund that serve the early childhood population. In  
23 the school age map, the background is third grade  
24 reading levels. And the dots are the programs that  
25 serve school age kids. And then in special

1 populations, you kind of have what I call our confetti  
2 map. So this is all the dots, everything we fund.  
3 And in the background is poverty.

4 So those are the three sets of maps that you  
5 have. And then what I'm going to do now is pause,  
6 give you a few minutes to be scanning over some of the  
7 information that's on here and asking any clarifying  
8 questions if something doesn't make sense.

9 MR. REYES: So on the 45 percent of children,  
10 Miami-Dade County, where more than 9,000, we know what  
11 the zip codes for these 9,000 children are?

12 DR. HANSON: Yes. And in fact, for our book club  
13 expansion, we have prioritized 11 specific zip codes  
14 where we actually looked at four different data sets.  
15 We looked at poverty, we looked at school readiness  
16 data, we looked at third grade reading levels. To Dr.  
17 Abrahante's point, that this has a lasting early  
18 childhood result.

19 And then we looked at our EBI data, which is our  
20 early development inventory that we collected in  
21 partnership with the school system a few years ago.  
22 That gives us actually a breakdown of developmental,  
23 five developmental domains of how kindergartners are  
24 looking. And we said which are the zip codes that  
25 have three or four of those indicators that are in the

1 wrong place, the wrong direction. The encouraging  
2 thing is we have 67 plus zip codes. We have a lot of  
3 zip codes, 11 zip codes. Only one zip code had all  
4 four of those indicators, you know, not where we would  
5 like to see them. Ten additional zip codes had three.  
6 So those 11 zip codes, for kids who are birth to five,  
7 in those 11 zip codes, I think it's about 30,000 kids,  
8 35,000 kids under five in those 11 zip codes. So now  
9 we're talking about 350,000 and 550,000 children in  
10 total, right, 27 percent of those are birth to five.  
11 But now we're saying, hey, there's this 35,000 set of  
12 kids, let's be somewhat strategic and focus in. So  
13 we're using data in those ways to look at that  
14 vulnerable support population aspect.

15 MR. HOPE: Last year at the, I think it was at  
16 the strategic planning meeting, a similar map was  
17 presented that highlighted certain geographic areas  
18 that were underserved and had some of the greater  
19 challenges. And I think at the time the discussion  
20 was how do we reallocate resources to address those  
21 specific communities that were highlighted on the map  
22 that had, I would say, some severe issues. Can you  
23 talk a little bit to what was presented then at the  
24 last meeting and now? In terms of have funds been  
25 reallocated to those areas, and what types of results

1 have we seen.

2 DR. HANSON: Yeah, the most similar map to the  
3 one that you're talking about is the special  
4 populations map. This is the map that has poverty in  
5 the background. The map that you're referencing from  
6 last year was the child rearing vulnerability was what  
7 we used in the background. That one actually takes  
8 into account like ten or 12 different factors related  
9 to family structure and family economic status and so  
10 forth. What was missing from that map that I think  
11 you all didn't have at the time was the dots that are  
12 on this map. The services and what they are and where  
13 they're in place. So we added that here so you can  
14 see what's in place in the places where there's more  
15 challenge related to poverty.

16 What I would say is that services are not the  
17 answer to all the challenges we see in the community.  
18 Hopefully I don't fall down dead because I work here  
19 at The Children's Trust, where the main thing we do is  
20 fund services. But many of the challenges in our  
21 community are rooted in history, they're connected to  
22 early childhood adverse experiences, they go outside  
23 of the boundaries of just, oh, you don't know how to  
24 read, let's give you a reading tutor and now you know  
25 how to read. There's a lot of reasons and root causes

1 behind why things look the way they look. And so I  
2 think that we are involved in many partnerships around  
3 the community that are looking at these issues and  
4 trying to work on things in a more systematic way.  
5 Partnering with community neighborhoods for them to  
6 look at what they're own challenges are and what they  
7 believe solutions might be useful. And so we're  
8 using, in that community engagement model that our  
9 community engagement team uses, which really puts a  
10 lot, tries to share the power of what are the ideas  
11 for improvement. So yes, we make sure that services  
12 and resources are available. That's part of the  
13 equation for sure, a very important part of the  
14 equation. Making sure people know about them, but  
15 also then engaging with the community around those  
16 challenges.

17 MR. KIRKLAND: To somewhat expand on Steve's  
18 comments, question, how do you measure the success  
19 impact of the reallocation of refocusing the funds?  
20 How is that done? What tool is used to determine if  
21 we make an impact in a positive way?

22 DR. HANSON: Well, as a whole, The Children's  
23 Trust, we look at whether we made an impact on these  
24 community factors. And what I can tell you is that on  
25 most of the key indicators that relate to children's

1 growth and development, if you look at a 15 year trend  
2 line, on many, many of these factors, we're doing well  
3 in terms of our progress, the direction, the change is  
4 happening. We're not doing so well in terms of where  
5 we've gotten to yet, right. We're not where we want  
6 children to be yet. And where we're also not doing so  
7 well is if you start to disaggregate that data, you  
8 see many disparities. And so we need to have more  
9 sophisticated approaches to reducing those  
10 disparities. And when we look at our data, we need to  
11 look deeper in the data, not just the high level,  
12 everybody's performance is here.

13 MR. HOPE: Just a quick follow-up question. So  
14 the vulnerability map was designed to highlight us  
15 some of the key areas that needed to be addressed. So  
16 one year later, it would be helpful to get an idea,  
17 this is where we were, this is the actions that we  
18 took, this is where we are at this point in time, so  
19 that we could determine whether or not as an agency,  
20 the Board needs to look at maybe allocating additional  
21 funding, or maybe looking at whether or not the  
22 strategic direction that we're implementing is  
23 addressing some of those areas identified from last  
24 year.

25 DR. HANSON: Yes. Well, so this year what we

1 decided to do, was because that index is very  
2 difficult to kind of kick apart 12 different factors  
3 on the map at the same time, especially when you then  
4 add all the different initiatives that we fund. We  
5 brought you back a map that shows you poverty and then  
6 what we thought was most related to the early  
7 childhood, school aged, you know, we picked two.  
8 There's a million that we could pick from, but we  
9 picked kindergarten readiness and third grade reading  
10 as those factors that we thought you should pay  
11 attention to and that are more directly related. We  
12 can't change single parent household. What we could  
13 work on is reading. We can work on school readiness  
14 and the whole child. We can work on ACEs, we can work  
15 on parenting support. So we try to kind of update our  
16 maps for you this year. And we have two minutes now  
17 before we need to have you guys shifting into your  
18 breakout sessions.

19 On the last slide in your printout, you have this  
20 slide. So that it tells you sort of where the  
21 different topic areas are. So we're in the training  
22 room now. Conference room A is this conference room  
23 on this side. And conference room B is the one over  
24 here in the lobby. And we're going to have you, each  
25 of you will have a Board member in there that's

1 facilitating your discussion. You're going to have  
2 staff members taking notes on the computer and on flip  
3 charts so that you can bring the flip charts back in  
4 here. You're going to talk specifically about the  
5 opportunities that exist, so specific existing  
6 opportunities, not just I wish this was here, but  
7 something that you know of that could be within reach  
8 of the Trust that you can take advantage of. A  
9 strategic policy or investment. And then challenges.  
10 Again, specific challenges or thrusts that might  
11 hinder our current implementation of our strategic  
12 plan or things that we need to be aware of going  
13 forward that might be current issues. That's what we  
14 want to hear from you. You're going to divide your  
15 time in each group to talk about both of those things.  
16 And so I'm going to invite you now, for the Board  
17 members only, to count off by three's, and then you'll  
18 go to the separate rooms.

19 Okay, so one's are going to start in conference  
20 room B.

21 MS. JORDAN: Do you rotate?

22 DR. HANSON: Yes. So the topic will stay in the  
23 room and you will go to each room. Yes. So the one's  
24 will start in conference room B. Let's have the two's  
25 stay here, and let's have the three's go to conference

1 room A.

2 (Thereupon, short break was had.)

3 MR. HOFFMAN: So, in any event, if you can fill  
4 that out before you leave and turn it in the front  
5 table or leave it at your table, that will be great.

6 So I want to turn it over to Lori. I thank  
7 everybody for their participation. I think if you've  
8 been in all three rooms now, you know that we  
9 gathered a lot of information. Some of it we'll have  
10 to filter after the meeting, but I think the purpose  
11 of this next exercise and session is to get a little  
12 bit more aware in terms of the Boards priority are.  
13 Again, there's a lot of information that we gathered,  
14 but we'll do what we can.

15 MS. HANSON: Yes. So thank you everybody for  
16 moving around and sharing your main ideas. I'm going  
17 to just tell you sort of what we have where. So on  
18 this side we have some of the notes from the  
19 opportunities and challenges related to early  
20 childhood. This one is a summary of the ones that  
21 came up in the school age discussion. And this, our  
22 most diligent group, special populations challenges  
23 and opportunities.

24 What we've done here is taken all your sticky  
25 notes that you put your topics on at the end of each

1 group and its color coded. So pink is from the early  
2 childhood session, blue is from the school age  
3 session and green, yellow/green from the special  
4 populations. I see we got more than one per person,  
5 probably inaccurate, but they all fit on the chart so  
6 we're good. And then the boxes that are on this  
7 poster are our seven priority investment areas.  
8 Right, these are our seven essentially budget  
9 categories. They overlap. Remember we talked about  
10 that in the beginning, they relate to one another.  
11 So that's why I'm not freaking out that there's only  
12 one sticky note in the parenting box because I know  
13 that, you know, even here where you're talking about  
14 other things and mental health and addressing special  
15 needs an special populations, that involves parents,  
16 right. So don't get too freaked out about that, but  
17 really what we wanted to see is just a visual  
18 snapshot, right. Where are your heads? Where are  
19 your discussion points laying out on the categories  
20 from parenting, early childhood development, youth  
21 development, health and wellness, family and  
22 neighborhood supports? This is where we do a lot of  
23 our place based, neighborhood based, special  
24 populations, work, community awareness and advocacy,  
25 program and professional development. And then we

1 have one box for other, right.

2 So there's some ideas that you guys came up with  
3 that related across, right. Some people talked about  
4 continuative care and essentializing connection,  
5 holistic approach to services. So we felt like that  
6 kind of came over here in its own box because it  
7 touches everything. So, also what we attempted to  
8 do, if you see sticky notes touching each other, that  
9 means they're similar ideas, right, so they're  
10 connected, they came up from more than one person as  
11 a top issue.

12 So, what we want to do now is give you a few  
13 minutes -- also, each Board member should have been  
14 given a little paperclip set of three dots. If  
15 somebody doesn't have one tell me. Make sure you  
16 have three dots. One has a number one, one has a  
17 number two, and one has a number three. What we're  
18 going to ask you to do is, you all went through all  
19 the groups and some of the groups you got to see the  
20 notes already from the prior sessions, but if you  
21 were in an earlier session for that topic, you might  
22 have not yet seen the ideas that were generated by  
23 the groups after you.

24 So we're going to invite you to do what we call  
25 a gallery walk. Go and look at what the early

1 childhood things say, chat with people about what you  
2 see, go and read the -- you have to step up closer to  
3 read them. Review what you see over here on, looks  
4 like the U.M., someone was from U.M. here, orange and  
5 green. And see what came up with the special  
6 population groups. After you kind of rotated to look  
7 at those three, bring your dots over here and put  
8 your one, two, three dot in one of these seven  
9 squares. If you want to put one, two and three all  
10 in the same square, you can do that, okay. You have  
11 those three dots. But if you have sort of two or  
12 three things that are really important to you, rank  
13 order them in your head and put your dots  
14 accordingly.

15 Does that make sense? Any questions?

16 Okay, so try to split yourselves evenly so that  
17 you're not all crowded up. It's quite crammed with  
18 all the furniture in here, but --

19 MR. HOFFMAN: I think the important thing here  
20 is, again, we're trying to give the staff some  
21 direction and inquiry. This is not the end of this  
22 process. We will, in the, probably not in the next  
23 Board meeting, but the Board meeting following, we'll  
24 have a further discussion on some sort of a policy,  
25 issues that have been identified.

1 MS. HANSON: Yes.

2 MR. HOFFMAN: And sometime in the interim staff  
3 will help us by kind of identifying what the  
4 priorities were.

5 MS. HANSON: Yes. We'll summarize this back.  
6 You can see it here a little bit, but we're going to  
7 put it all together and feed all this information  
8 back to you. As Ken said, the next set of Board  
9 meetings is TRIM. There's a short Board meeting  
10 before the first TRIM hearing, so that's a quick  
11 turnaround meeting. And its really focused on the  
12 critical business of the Board has for approving the  
13 budget and millage rate. So we will be talking about  
14 this again at the October Board meeting and we'll  
15 have some information back out to you guys before  
16 that.

17 Good?

18 MR. HOFFMAN: Yes.

19 MS. HANSON: Okay, thank you.

20 Feel free to move around.

21 (Thereupon, short break was had.)

22 MS. KOBRINSKI: Shanika and myself are the  
23 attorneys assigned to The Children's Trust Board.  
24 Basically what's coming up in September is we're  
25 going to have two hearings. They're called the TRIM

1 hearings. TRIM stands for Truth in Millage. And so  
2 we're going to be having a TRIM hearing on September  
3 9th, and then a second one on the 16th.

4 And so what the TRIM is, is basically the  
5 Florida statute that allows the county to set up The  
6 Children's Trust. Steps for the mechanism by which  
7 the Children's Trust can get a percentage of the  
8 property taxes, the property taxes in the county.  
9 And the statute sets up half of that millage, at .5.  
10 And so, The Children's Trust, every year, adopts a  
11 rate of what percentage they're going to charge for  
12 the millage tax for all the property in Miami-Dade  
13 County. And based on that, The Children's Trust gets  
14 income that allows it to distribute the money for  
15 children's services in the county. Allows the  
16 Children's Trust to operate. Allows us to designate  
17 the services. It's all the funding that we make in  
18 use, priority decisions, that this money allocations  
19 based on.

20 So the first TRIM budget hearing is going to be  
21 on the 9th. And the first thing that's going to  
22 happen is that they're going to ask the Board to set  
23 the millage. And once the millage is set and  
24 adopted, tentative millage, and then they're going to  
25 adopt the tentative credited. So based on that

1 millage, we'll know what that budget is. I believe  
2 the tentative rates have already been adopted by the  
3 Board back in July when there was discussion about  
4 the budget at that time. So the first hearing is  
5 really more of a formal proceeding. There probably  
6 won't be a lot of discussion, but it will be starting  
7 at 5:01 per the Florida statute. And we'll allow  
8 public comment period. And then following that,  
9 there's kind of a script for the proceedings that  
10 we'll go through. The Board will adopt the millage  
11 rate and then they'll adopt the budget. And the same  
12 thing will kind of happen at the second one. It's  
13 kind of a similar formula. So once we've adopted the  
14 tentative, a notice is given out to the public about  
15 what the millage rate is that The Children's Trust is  
16 considering adopting. And then the 16th hearing  
17 they'll adopt a final, a final millage and a final  
18 budget rate. And that will be sent to the property  
19 appraiser and at that point that's when the taxes  
20 take effect.

21 So you'll hear what's called a rollback rate.  
22 And a rollback rate is where the Board adopts a  
23 millage that's, kind of maintains the previous years  
24 funding at the same level. This year, I believe, The  
25 Children's Trust is considering adopting an increased

1 rate. I don't remember the exact calculation. So  
2 they're going to be increasing the millage rate, so  
3 they'll take in more funding. And you know it's very  
4 important that there's a quorum at the Board because  
5 if there's no quorum, there's not going to be money  
6 coming into The Children Trust, so we stress that  
7 it's very important for you to be present. And also  
8 that the Board actually do with their tasked with  
9 doing, which is adopting the millage, adopting the  
10 budget.

11 This is a set formula, a process, and without it  
12 there's no way The Children's Trust can continue to  
13 operate without the funding stream.

14 Is there any questions about this? This is just  
15 kind of a brief introduction about what's coming up  
16 in the next few meetings.

17 MS. GRAVES: We also just wanted to take a brief  
18 moment about Board members in your bubble, as a  
19 member of this Board. So you will, at some point,  
20 have your initial Board member orientation that will  
21 be provided by the Trust, but after that initial  
22 Board member orientation, there is also an ethics  
23 training. So the commissioner on ethics will come in  
24 and do a comprehensive training.

25 Part of that, we just want to talk about roles

1 and responsibilities, what's expected of Board  
2 members. If you need assistance with anything, who  
3 you can contact. So I believe the Trust has  
4 executive staff members who are assigned to all the  
5 Board members to -- if you have any questions, but  
6 you can also contact Leigh or I. But one of the  
7 biggest and most important roles that you have as a  
8 Board member is these are public dollars and public  
9 funds that you are allocating and authorizing to be  
10 used. And so we always have to keep in mind that you  
11 have a fiduciary responsibility. What does that  
12 mean? That you can't have a conflict with interest,  
13 that you have to look at what the statute and the  
14 ordinance that authorizes the creation of the  
15 establishment of the Trust to exist, allows.

16 You also have to know, like, so the Trust is  
17 subject to Sunshine Laws. What is Sunshine?  
18 Everything has to be open to the public, so two Board  
19 members cannot meet outside of a publicly noticed  
20 meeting to discuss matters that they may vote on as  
21 members of The Children's Trust. In addition to  
22 that, you have public records. So the public records  
23 law applies to you as a member of the Trust. If you  
24 send emails or documents, a member of the public can  
25 say Children's Trust, we want that. Even if you sent

1 a text message, if it's about Children's Trust  
2 business, those electronic records are covered.

3 And so we have suggested that you steer away  
4 from text messages because sometimes people  
5 automatically delete them. If you do text, then you  
6 have to keep a record of that. It could be a  
7 screenshot, you could print it out, but sometimes  
8 that's not really practical and it's difficult to do  
9 because texting is so dynamic, you do it, you do it,  
10 you do it, and you just forget about it. Or unless  
11 you're like me, you keep everything and so then you  
12 can't find anything. But those two are like two of  
13 the biggest issues.

14 And we'll go back to Sunshine just for one quick  
15 minute because it's so easy to violate Sunshine  
16 without any intention. And there are criminal and  
17 civil penalties for violations if you violate  
18 Sunshine. There has even been, I recall, one person  
19 who was in prison, in jail for Sunshine violation.  
20 Now that is really the outer end of the spectrum, but  
21 we just want everyone to know that it is a  
22 possibility.

23 So, Sunshine violations, if staff contacts you  
24 about a Board item and you say -- I'll give an  
25 example of a Sunshine violation that we had before, I

1 believe, last year. The Trust was working on bylaws,  
2 changes to the bylaws. We had several versions. The  
3 chair at that time had a draft, she gave it to staff.  
4 Staff then spoke to another member of the Board,  
5 showed that member, the chairs revisions and drafts.  
6 That member, the second board member made additional  
7 revisions and those additional revisions were then  
8 given back to the chair. That was a Sunshine  
9 violation. Because staff was used as a conduit,  
10 although unintentionally, to communicate two  
11 different board members impressions of what they  
12 wanted to do with the bylaws outside of a publicly  
13 noticed meeting. Who would have ever thought that  
14 would be -- it could happen, but it happens. And so  
15 we always error on the side of being overly  
16 conservative and say that if staff presents  
17 something, just take it. One board member -- if you  
18 want to send something to the Board, send it to  
19 staff, staff can send that to the entire Board. It  
20 won't be a violation as long as there's no feedback  
21 until the publicly noticed meeting.

22 MS. HANSON: Just on the public records, like  
23 she said, you know, maybe you want to have an email  
24 folder for all of your email notifications for  
25 Children's Trust staff about The Children's Trust, so

1 you can just folder it and preserve it. You could  
2 also copy Muriel on everything, she's the clerk for  
3 the Board. That's another way of preserving  
4 communication. The Children's Trust doesn't get a  
5 lot of public records requests, but it could. And in  
6 that case we want to be able to easily retrieve it  
7 and provide it. So just kind of set it aside and we  
8 won't have to deal with that.

9 MS. GRAVES: So when you have your ethics  
10 training, the commission on ethics will go in more  
11 detail about it. But until -- and it will be about  
12 the conflict of interest and public ethics ordinance,  
13 the citizens bill of rights, which has special duties  
14 and obligations of Board members in there for the  
15 public. It will be Sunshine public records and a few  
16 other laws. But until then, if you have any  
17 questions, feel free to contact either of us, we'll  
18 be happy to help, and welcome to the Board.

19 MR. HAJ: Thank you. Any questions?

20 Thank you, everybody.

21 (Whereupon, at 10:40 a.m., the meeting was  
22 adjourned.)

CERTIFICATE OF REPORTER

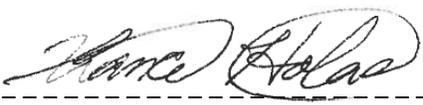

STATE OF FLORIDA  
COUNTY OF MIAMI-DADE

I, XIANCE HOLAS, court reporter and Notary Public do hereby certify that the foregoing proceedings were taken before me at the time and place therein designated, and that the foregoing pages numbered 1 through 53 are a true and correct record of the aforesaid proceedings.

I further certify that I am not a relative or employee, attorney or counsel of any of the parties, nor am I a relative of any of the parties' attorney or counsel connected with the action, nor am I financially interested in the foregoing action.

Under penalties of perjury, I declare that I have read the foregoing certificate and that the facts stated herein are true.

Dated this 20th day of September 2019.
